**DONATE**

**0-60 mph in 4 seconds**

**Top speed of 140 mph**

**Over 120 miles on a  
single battery charge**

**Help FAU High School students race their electric vehicle at the national EV Challenge in North Carolina on April 25, 2015**

The EV Challenge aims to energize high school students about engineering through a real world electric vehicle racing experience. This program is an incredibly inspiring and high profile education program where high school students build real, full-size plug-in electric vehicles.

Our FAU High GT-EV Racing Team, as part of our STEM (Science, Technology, Engineering and Mathematics) initiative, has built a one-of-a-kind, innovative, and exciting electric vehicle.

Generous sponsors have contributed over \$40,000 to help get the FAU High GT-EV race car ready to race. Now we need your support to get our team to the starting line!

For any questions, please contact our STEM Coordinator:  
Allan Phipps at 561-297-2857 or [aphipps@fau.edu](mailto:aphipps@fau.edu).

Donations in excess of \$5,000  
qualify for your company logo to be displayed prominently on our car
